PROFESSIONAL SUMMARY

Results-driven Software Engineer with 3+ years of experience designing and building scalable technology platforms across backend APIs, web frontends, and centralized authentication services. Proven track record of architecting service-oriented REST APIs, implementing OIDC/OAuth 2.0 SSO, designing role-based workflow systems, and leading LMS platform migrations serving 11,000+ users. Ships features end-to-end — from database schema through CI/CD pipelines using Docker and GitHub Actions.

WORK EXPERIENCE

Edutech Portal Solutions | Software Engineer | Ibadan, Nigeria **Mar 2023 – Present**

- Led the migration from Moodle LMS to a custom-built LMS integrated with the student portal, serving 11,000+ students, lecturers, and administrators.
- Built a centralized OIDC/OAuth 2.0 authentication server providing single sign-on across all platform applications with role-based access control for students, staff, and lecturers.
- Designed a role-based payment approval workflow system with a multi-stage pipeline of parallel routes for different roles.
- Implemented real-time features including chat, virtual classroom/webinar management, and live commenting systems.
- Owned infrastructure end-to-end (CI/CD, caching, storage, and automated testing) maintaining 95% uptime across core services.

Crop2Cash | Backend Web Developer Intern | Ibadan, Nigeria **Jan 2022 – Apr 2022**

- Built an internal customer support tool in Node.js that reduced response time by 15%.
- Improved API documentation with Postman, saving ~2 hours of onboarding and integration time per project.
- Drove a major codebase refactor that reduced system latency by 45% and accelerated feature delivery time-to-live by 8%.

Daabo | Fullstack Web Developer | Lagos, Nigeria **Oct 2021 – Jan 2022**

- Designed and implemented the initial platform architecture using Node.js and Next.js as part of a 3-person team.
- Introduced unit and integration testing with Jest plus monitoring tools, reducing bug reports by 20%.
- Streamlined CI/CD pipelines with GitHub Actions and Docker, improving deployment speed by 15%.

PROJECTS

Chip 8 Emulator | Rust | GitHub
A low-level emulator for the Chip-8 virtual machine, written in Rust.
Update Playlist | Java, Picocli, GraalVM Native Image | GitHub
A Java CLI tool that samples music files to update MP3 metadata tags like title, artist, and album.
Udacity DevOps Microservices | CircleCI, Docker, Kubernetes, AWS, Flask | GitHub
A microservices application featuring CI/CD, container orchestration, and monitoring as part of a DevOps engineering project.

EDUCATION

University of Ibadan | Ibadan, Nigeria **Jun 2019 – Mar 2025**
Bachelor of Science (B.Sc.), Computer Science (3.59/4.0 CGPA – First Class Honours)
Relevant Coursework: Data Structures & Algorithms, Computer Operating Systems, Assembly Language Programming, Software Engineering, Systems Analysis, Compiling Techniques, Formal Languages & Automata Theory.

LEADERSHIP EXPERIENCE

Computing Conference Co-Lead, National Association of Computing Students, UI **Jan 2025**

- Co-led a 20-person team to organise the first conference in over a decade, themed "Tech Fusion: From Classroom to Career."
- Secured 11 speakers from academia and industry, and aligned sessions with trends in AI, cloud, and software careers.

NOTABLE ACHIEVEMENTS

- **Scholar**, Nigeria Higher Education Foundation **Jun 2024**
- **Dean's Roll of Honour (3x)**, Faculty of Science, University of Ibadan **Feb 2024**

SKILLS & INTERESTS

Technical Skills	Java, JavaScript, TypeScript, Python, Git, Unix, MongoDB, PostgreSQL, Spring Boot, React, Node.js, Docker, Kubernetes, CircleCI, Amazon Web Services, Google Cloud Platform
Soft Skills	Leadership, Attention to Details, Teamwork, Adaptability, Problem Solving, Time Management
Languages	English (*Fluent*), Yoruba (*Fluent*), German (*Beginner*)
Interests	Software Engineering, Music, Equity Financing, Business Administration, FinTech, Engineering Management.
